PROJECTS

Backbase content management System — *Publishing Content*

Post publishing is the process of finalizing and making content available to the public on digital platforms. It involves editing and formatting the content, adding metadata for search engine optimization, and scheduling or immediately publishing it on a website or content management system.

Material Management System — *Software Support*

working with Bhabha Atomic Research Centre (BARC), I focused on their material management system. The system followed a specific flow:Users filled out an indent form in the system.My role involved developing the indent form, streamlining tender handling and quotation management, implementing a recommendation system, and ensuring a seamless ordering process within the MMS software. I aimed to enhance BARC's material management operations by delivering a robust and user-friendly system.

Website Development — *Website Template*

Design Website on Figma UI Tool, Converting That File Into Website in Format of Html, Css, Bootstrap. Creating Clean Code Websites For Reuse in Different Shops or Services.

Website Development — *Electronics Company*

Create a website for an Electronics Company. Designing Website and host on online server.

Website Development — *Wordpress*

Creating Wordpress Website. Install wordpress site on server, installing plugins, themes and managing blogs.

Website Development — *Electronics*

Create a Website for Store. Listing Products Adding Payment gateway. College Mini Project Host on Local Server.

IOT — *Smart RC Bot*

A Smart RC Bot is the project which will be running on NodeMCU and other components of IOT.

DECLARATION: I hereby declare that the above-mentioned details by me are true to the best of my Knowledge.
